Summary

Experienced Full Stack Developer with expertise in React.js Node.js and Python, specializing in Express js Flask, Django, and FastAPI. Skilled in database management with MongoDB, Firestore, MySQL, SQL, and PostgreSQL, and integrating cloud storage solutions like Amazon S3, GCP Bucket, and ECP. Passionate about AI-driven development, particularly interested in Large Language Models (LLMs).

Technical Skills

- Web Development: React.js, Node.js, Python(flask,django),HTML5,CSS3(SCSS).
 - Database Management:MongoDB,Firestore,MySQL, SQL, PostgreSQL.
 - Storage Solutions intefration:Amazon S3,GCP Bucket,ECP.
 - Programming Languages:JavaScript, Python.
 - Version control:Git,GitHub.
 - Cloud Technologies: AWS,Google cloud platform(GCP).
 - Prompt Engineering.
-

Experience

PrimoTech Jul 2022 –Till Date (2 year 9 Months)

Projects

Figure1 Medical Collaboration on Real Patient Cases | Figure 1

Technologies: Python (Flask, FastAPI) GCP cloud run CI/CD pipeline,

--Developed a face detection system using OpenCV's DNN module with deploy.prototxt and res10_300x300_ssd_iter_140000.caffemodel, capable of detecting front and side faces with 98% accuracy, and deployed the application on GCP Cloud Run for scalable inference.

Abrams Books Publisher Homepage – Abrams Books

Technologies: Python (Flask, FastAPI), Node.js, React.js, MongoDB, GCP (DataPrep, Apache Airflow Composer, Cloud Run, Cloud Functions, BigQuery), ETL

Project Description:

- Developed web applications including ABR-COOP, ABR-SEG, ABR-Title-List, and ABR-Partner-Portal for managing and analyzing book sales and marketing campaigns.
- Implemented Microsoft AD Authentication for secure user access.
- Designed and managed ETL pipelines using GCP DataPrep, Apache Airflow Composer, Cloud Functions, and BigQuery to process over 10,000+ popular books, including detailed breakdowns for Harry Potter and other bestsellers.
- Built an automated PDF extraction module to capture invoice data from Amazon and other distributors, extracting ISBN, price, and metadata for seamless database updates
- Enhanced forecasting models by transforming raw data into meaningful insights for publishers and partners.
- Optimized data security and API performance, ensuring scalability for large datasets and real-time analytics.

Wallboard AI Physicians Weekly Wallboard AI

Technologies: Python (Flask, FastAPI), Node.js, Open AI API

- Developed an automated content generation and customization system using templates and OpenAI technologies.
- Integrated dynamic data modification to ensure relevance and accuracy.
- Implemented a pre-print module to automate QR code generation for wallboard pages, enhancing accessibility. -

Continuously explored enhancements for future development

-Implemented OpenAI API integration to process and transform existing datasets, enabling dynamic paragraph generation, summarization, and expansion based on context-specific requirements.

Med-Mine 🌐 **MedMine LLC | From Data to Insight**

Technologies: Python (Flask, FastAPI), Node.js, Linear Regression model

-Designed and developed a data management system to extract, filter, and manipulate structured data from raw sources.

-Implemented functionality for approving, disapproving, and editing data entries, ensuring data quality and accuracy.

-Utilized MS SQL to efficiently retrieve and analyze data, focusing on identifying and addressing pending fields.

- Worked on a Linear Regression model for data forecasting and prediction tasks.

EMS

EMS (Employee Management System): A comprehensive solution for tracking employee time, tasks, and attendance to streamline workforce management

Oblivision

Oct 2021 –jul 2022 (9 Months)

-Developed and deployed multiple full-stack web applications using the MERN stack.

-Proficient in HTML and CSS, fundamental for web development and the structure and presentation of web pages.

-Familiar with front-end frameworks such as React, Angular, or Vue.js, enhancing development efficiency and management of complex web applications.

Resume Builder:-

-User-friendly platform designed to simplify the process of creating professional resumes and CVs.

-Provides intuitive templates and customization options for personalized documents tailored to career aspirations.

-Offers dynamic features for easy editing, formatting, and exporting.

-Empowers individuals to effectively present their skills and experiences

Origin infra:-

Origin Infra is a sophisticated infrastructure project tailored for the real estate industry, focused on efficiently gathering and managing client data

Education

Master of computer application

Lovely Professional University (MCA) program in Jalandhar, Punjab Jan 2023 – Present

Bachelor of Computer Applications

Punjab University, Chandigarh july 2018 - May 2021
